**Cedar Veterinary Group** is your local **independent** veterinary practice welcoming all domestic animals in need of friendly and professional veterinary care. As a **RCVS accredited practice**, we are dedicated to providing an excellent service for all animals in our care. We actively promote preventative healthcare to help your much-loved pet remain happy and healthy. We provide our own 24 hour care to all of our patients and have a comprehensive range of diagnostic equipment, allowing us to examine and diagnose conditions quickly. From routine vaccinations to major surgery, our team are fully committed to providing the expert veterinary care your pet deserves.

## PAST AND PRESENT

The Cedar Veterinary Group prides itself on being independent and was established in Alresford in 1893. The practice expanded to Alton in 1923 and then to Four Marks in 1985. The Alton surgery, having undergone an extensive refurbishment, now offers the latest facilities providing outstanding care for your pet.

## EQUINE CARE

We provide a wide range of services ranging from routine vaccinations and dentistry through to lameness workups and investigation of medical conditions. All our equipment is mobile and consists of digital radiography, ultrasonography and endoscopy.

We also offer an Equine Healthcare Plan which covers vaccinations, dentistry and other preventative services.

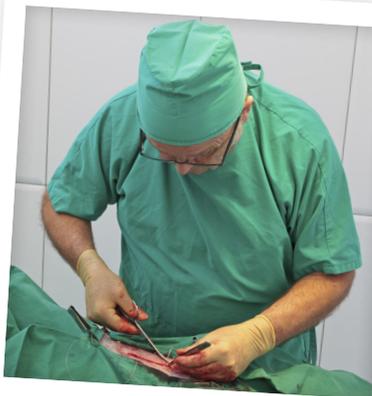

## PET HEALTHCARE SCHEME

We recognise the importance of preventative healthcare and actively encourage vaccinations and routine worm and flea control. We offer a pet healthcare scheme which allows you to spread the cost of routine treatments and healthchecks into discounted monthly payments.

Membership of this scheme entitles you to reduced fees on other services such as neutering, dentals and in-house laboratory fees. We also offer a geriatric plan which includes further monitoring for conditions that occur commonly in older animals.

## NURSES CLINICS

Our highly experienced team of Veterinary Nurses offer a wide range of services that are beneficial to your pet's health, and are informative for the owner too. From nail clipping to post-op checks, our nurses are here to help and advise on your pet's general healthcare and well-being. We also run puppy parties, health checks for older pets and a "cuddly club" for our overweight patients.

## SURGERY FACILITIES

### Consultation Rooms

Provide a calm and private environment, to discuss the health concerns of your pet and perform an initial examination

### Operating Theatre

Modern, sterile, fully equipped and available 24 hours a day for comprehensive range of routine and emergency procedures

### Laparoscopic (Keyhole) Procedures

We are able to carry out keyhole neutering of bitches (>5kg) at our Alton surgery

### Dental Facility

Houses high-tech ultrasonic scaling and polishing systems

### In-House Laboratory

Full on-site equipment to perform a wide range of blood tests for rapid results

### ECG

To investigate abnormal electrical activity within your pet's heart

### Digital X-Ray

All our surgeries have the latest digital technology providing images on screen within 30 seconds and allowing us to email x-rays to specialists for instant second opinions if needed

### Ultrasound and Endoscopy

Our ultrasound and endoscopy equipment gives non-invasive images of the body as it actually functions

### Dog and Cat Hospitalisation Wards

Providing safety and comfort for your pets while they are away from home

### Isolation Facilities

Providing complete containment for pets with transferrable diseases

### Preventative Healthcare

Vaccinations - Health Checks - Parasite Control - Dental Care - Neutering - Prescription Diets

### PETS Passport

Want to travel abroad with your pet? Our vets can help you through the process to obtain and authorise the necessary documentation

### Microchipping

A simple and permanent means of pet identification

### Referrals

At times it may be necessary to refer our patients to specialist centres. We have an excellent relationship with local referral centres who provide outstanding services and care in their particular field of medicine

We provide excellent facilities and services which enable us to identify symptoms, diagnose accurately and treat effectively

## FEES AND COSTS

We ask that all fees be paid on completion of your consultation, upon discharge of your pet after treatment and on collection of medication and diets. However, if this may be a problem for you, do not hesitate to speak with us prior to the start of your pet's treatment as we will be happy to provide an estimate of costs at your request.

## INSURANCE

Modern veterinary medicine now enables us to diagnose and treat a wide range of conditions. Certain problems can incur expensive procedures and medications. We therefore strongly recommend life-long insurance for your pet. There are many policies available and they are all different, so please read them thoroughly.
